

SCADA Consultant

Do you want to contribute to the secure, reliable construction and operation of renewable assets for an international and market-leading asset management consultancy within the renewable energy industry? PEAK Wind is seeking a SCADA Consultant who can be an integral part of our SCADA and Cyber Security team, ensuring best-in-class deliverables for our clients and building a bridge between technical, commercial, and operational OT and SCADA assets.

Trusted Advisors for Developers and Investors for some of the Largest Renewable Assets

At PEAK Wind, we specialise in operations, asset management, and project management of renewable energy assets. We take pride in providing best-in-class commercial, financial, and operational advisory and support to our clients. We work with some of the world's largest infrastructure investments and are proud to count market-leading utilities, investment funds, and Independent Power Producers among our clients.

Solution-driven SCADA Consultant with Technical Network Know-how

Based in Aarhus, Copenhagen, Hamburg, or Zaragoza, you will be supporting clients in all aspects of the project lifecycle, from early development to operation.

We are a dedicated team of mixed seniorities and nationalities with a collaborative way of working. SCADA and Cyber Security is a key area for our clients and receive increased attention on both greenfield and brownfield projects. The team works across different disciplines, ensuring seamless integration, operation, and Cyber Security of OT, ICS, and SCADA systems.

Your responsibilities include:

- Drafting and reviewing requirements for suppliers and service providers of OT systems, SCADA, and Cyber Security for renewable assets, mainly within onshore and offshore wind
- Negotiating SCADA and Cyber Security requirements in various supply and service contracts on behalf of our clients
- Designing basic network architecture and identifying functional requirements from network designers
- Supporting operational teams on OT, SCADA, and Cyber Security investigations and improvements
- Identifying and integrating technical upgrades, new systems, and functionalities
- Managing sub-suppliers for performance management, defining maintenance, and optimizing the reliability

Experienced SCADA Consultant with a holistic mindset:

We are looking for a candidate with knowledge within OT/SCADA systems and Cyber Security. You have worked with SCADA, critical OT or IT systems, across the array of different systems used in production environments for the last three years. Furthermore, you are familiar and used to working with security standards such as ISO270xx, IEC62443, NIS2, or similar. Knowledge of industrial computer networks is an advantage, but not a requirement.

Irrespective of your background, you are solution-oriented and like to find smarter and more efficient ways to solve problems. You are motivated by solving problems and finding solutions that work in the real world and not just on paper. Preferably, you have some experience in project management, which has given you commercial awareness and the ability to work independently. Experience in the wind turbine industry will also be considered an advantage.

The ideal candidate is self-driven, proactive, and has a solution-oriented attitude. You are a good communicator with a proven ability to build sound business relationships and represent them in project meetings and presentations. As PEAK Wind is an international company, you need to have good English communication skills.

Experience the Highest Degree of Involvement

PEAK Wind is dedicated to fostering a work environment that values diversity, and our values of Expertise, Passion, Unity, and Integrity are materialized through our team members every day. Here you will be able to utilize your financial skills while developing a strong understanding of renewable energy assets. We offer an opportunity to get on board and experience the highest degree of involvement and responsibility in PEAK Wind's global renewable energy team. Together with the rest of the team, you will play an instrumental part in the continued success of PEAK Wind. Above that, you will participate in an entrepreneurial environment, with a focus on cooperation and a desire to change the status quo. The position will also offer global exposure as our clients work globally.

Interested and want to know more?

If you have any questions or want to know more about the position, please contact People & Development via recruitment@peak-wind.com. We look forward to receiving your applications & CVs as soon as possible, latest **July 31st, 2025**. Please apply through 'Apply' at the bottom of the page. Applications will be assessed on an ongoing basis.

PEAK Wind is dedicated to fostering a work environment that values diversity. We encourage all interested candidates to apply, regardless of age, race, gender identity, sexual orientation, disability, religion, or ethnicity.
